

## ABC IMAGING APPOINTS NEW VICE PRESIDENT OF 3D SERVICES AT WASHINGTON, DC HEADQUARTERS

### ABC Imaging is happy to announce the appointment of Phil Magenheim as the Vice President of 3D Services at our headquarters in Washington, DC.

Given the current advancements in 3D technology and the usefulness that 3D data affords many of our clients, ABC Imaging continually strives to evolve its 3D services and capabilities. Under Phil's direction, ABC Imaging's 3D Division will continue to expand its services in areas including 3D scanning and BIM related services.

Phil joins ABC Imaging after over 25 years of experience in the printing and reprographics industry. Prior to working at ABC Imaging, Phil managed a reprographics services firm and established a wide format scanner and software distribution enterprise. Phil's success has led him to the field of 3D printing and 3D scanning, and he is now focusing his efforts specifically on products and

services for the AEC community. We are confident that Phil's extensive background in reprographics and 3D technology will positively impact the development of the 3D services we provide.

ABC Imaging began providing 3D printing services in 2008 and continues to grow its capabilities and experience in 3D technology. We are expanding our reach in the AEC markets as well as in industrial and commercial design, and continue to add to our variety of 3D tools. ABC Imaging offers 3D services on-site at client locations and at ABC Imaging stores in the United States and internationally.
